

OUR DWOP EXPERIENCE

First we would like to introduce ourselves: we are 16 and 17 year-old students from Ribera del Tajo School in Talavera de la Reina(Spain).

Our school has given us the opportunity to visit other countries and know their cultures thanks to this Comenius Project. "Don't Waste Our Planet" has been the best project we have ever had because we both worked hard and had a great time. We have learnt about the terrible consequences of air pollution, how to recycle and reuse stuff and have become aware of how much e-waste we generate with our mobile phones.

All the trips we have made with the project have helped us to improve our English vocabulary and to know how to take care of our planet. We have learnt how to share our opinions and how to work in groups because each group has been working on workshops and doing cool things. We have also learnt some Italian, Polish, German and Dutch words.

For us, it has been an amazing and unforgettable experience because we have met incredible people from Italy, Poland, the Netherlands and Germany. We have learnt about traditions and other languages. The best of the experience has been making new friends and having a good time and laughing with them. But when we think that the project is over we are sad. We would love to see them again and repeat all those awesome moments with them.

Delia, Lara and Raluca.
